

# Bronze or Iron?

What was life like in the Bronze and Iron Age?

This term we will be continuing our learning about the early history of Great Britain. Building on from our discoveries about the Stone Age, we will be investigating how the discovery of metals impacted on the lives and societies of the inhabitants of Britain.

As archaeologists, we will be creating questions and unearthing the answers by exploring artefacts and evidence from the Bronze Age.

As artists, we will be looking closely at artefacts from the period and developing our pencil sketching skills. We will also be delving into the world of Beaker Culture and making our own clay pots.

As authors, we will be using our research about the Bronze and Iron Age and we will be producing reports presenting our findings including information about a famous historical person known as the Amesbury Archer.

We are really excited to begin this topic and finding out about the Bronze and Iron Age. If you are already eager to learn, why not check out these websites for extra information.
