

# Are You a Survivor?

Get ready this term to travel to distant lands and explore the adventures of a range of explorers and survivalists.

This term we will be ...

Historians, learning about the explorers and survivors of the past, where they travelled, what they found and the difficulties they encountered along the way.

Geographers, using atlas's and globes to track the routes of different explorations.

Scientists exploring and finding out about everyday materials and their properties. Thinking about which materials would be suitable for different survival uses e.g. to carry water, build shelters.

Writers, sending postcards and letters in role as survivalists and making exploration videos using our ICT skills.

Artists and designers taking natural rubbings and building our own shelters.
